Fieldwork online
GIS-based electronic learning environment for supervising fieldwork
Koko Alberti, Rein Baarsma, Wouter Marra (w.a.marra@uu.nl), Derek Karssenberg

Supervising students in distant places can be a logistical challenge and requires a significant time investment of their supervisors. We developed an online application for remote supervision of students on fieldwork.

Try online: http://fwo.geo.uu.nl Username: EGU2016, Password: Vienna

Student workflow:
1 - Collect data and GPS-location
2 - Make digital fieldbook in Excel
3 - Upload Excel data
Both students and supervisors see map with fielddata
Photos, sketches and documents can be uploaded too

Supervisors workflow:
1 - Review students data and leave feedback
2 - Access data using GIS software & archive

Want to use this?
Let us know! We are happy to help! (FWO is also open-source)

Ideas?
Improvements? Similar experiences? Let us know!

Apps for fieldwork and maps?
What apps are you using? Mobile apps? Webapps? Let’s share experiences!
